Warren,

Thanks for the update and the official extension. I will be on vacation this Friday but our well operator from ERM will be on-site running the injection wells and ENTACT will be on-site conducting Remedial Activities. Do I need to arrange for someone from Project Navigator to be on-site during your visit? Thanks.

Kindest Regards,

Brian Moore

Brian:

Due to the on-going heavy rain events and the long term wet forecast associated with the strong El Nino, I hereby extend my emergency authorization to operate the disposal wells associated with the Malone NPL until 31 December 2015 or until the ESD associated with the Site is approved, whichever comes first. I will continue to conduct Site visits and periodic inspections during this time frame. I plan on visiting the Site this Friday, 13 November.

Regards

Warren

Subject: Malone-EPA ER Week 18 Summary

Dear Warren and David,

Below please find a general weekly update discussing injection under EPA ER at the Malone Service Superfund Site in Texas City, TX. Attached please find the injection summary table.

The site received 1/2 inch of rain this weekend so we finally had some good luck. There is still approximately 4.5 MM gallons of contact water on-site which at our current weekly injection rates (680K) will take approximately 6 weeks to inject.

Monday 11/2/15- WDW-138: Contact water injection non-stop. WDW-73: Contact water injection during working hours.

Tuesday 11/3/15- WDW-138: Contact water injection non-stop. WDW-73: Contact water injection during working hours.

Wednesday 11/4/15- WDW-138: Contact water injection non-stop. WDW-73: Contact water injection during working hours.

Thursday 11/5/15- WDW-138: Contact water injection non-stop. WDW-73: Contact water injection during working hours.

Friday 11/6/15- WDW-138: Contact water injection until end of working hours. WDW-73: Contact water injection during working hours.

Should you have any questions please let me know.

Kindest Regards,

Brian Moore
